

University Practical Examination Report

Subject: Library Book Management System (SET B)

Roll Number: 24DCE149 | Batch: B | Date: August 20, 2026

Screenshot 1 — React Application

Shows the Library Book Management System React application running locally in the browser (port 5173), featuring dynamic books rendering from the API.

[Screenshot Placeholder: screenshot1.png]

Instructions: Take a screenshot of the system showing the screenshot 1 — react application, save it as 'screenshot1.png' in the root directory, and re-run "npm run report" in the backend folder.

Screenshot 2 — REST API

Shows a successful GET /api/v1/books request response containing JSON catalog details, tested using Postman / Thunder Client.

[Screenshot Placeholder: screenshot2.png]

Instructions: Take a screenshot of the system showing the screenshot 2 — rest api, save it as 'screenshot2.png' in the root directory, and re-run "npm run report" in the backend folder.

Screenshot 3 — MongoDB

Shows MongoDB Compass or MongoDB Atlas reflecting the seeded Book and Member collections and a successfully saved Borrowing record.

[Screenshot Placeholder: screenshot3.png]

Instructions: Take a screenshot of the system showing the screenshot 3 — mongodb, save it as 'screenshot3.png' in the root directory, and re-run "npm run report" in the backend folder.
